The headline inflation rate in January 2016 (i.e. the annual percentage change in the CPI in January 2016 compared with that of January 2015) for the country is 5.6 %. This annual rate of inflation is 0.7 index points higher than the corresponding annual rate of 4.9 % observed in December 2015.

The Month on Month inflation rate (i.e. the percentage change in the CPI in January 2016 compared with that of December 2015) is 0.6 %.

**This Higher headline inflation was due to increasing annual rates of change reflected in January in the price indices for:**

- Food and non-alcoholic beverages which increased from 5.2 % in December 2015 to 6.6 % in January 2016. Fish and seafood, meat, bread and cereals as well as fruits and vegetables were seen as the leading products that caused the increased price index.
- Miscellaneous goods and services increased from 9.1 % in December 2015 to 9.7 % in January 2016. Under this category, products falling under electrical appliances for personal care were the leading products that contributed to the increase in the price index.
- Transport which increased from -1.0 % in December 2015 to 1.6 % in January 2016, where the increase in bus fares, spare parts and accessories for personal transport were the leading causes of the increase in the transport industry.

**The increasing rates were slightly counteracted by decreasing rates of growth in the price indices for:**

- Furnishing, household equipment, and routine household maintenance which decreased from 5.4 % in December 2015 to 4.5 % in January 2016.
- Recreation and culture which decreased from 5.2 % in December 2015 to 4.5 % in January 2016.
